(SEPARATE SHEET)**

Re Item V

**Reasoned statement with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement**

1. Reference is made to the following documents:

D1: US 2002/147903 A1 (2002-10-10),
D2: WALDIN R: "Re: Dependency Sorting, first of kind" (1999-11-02),
D3: WO 01/46798 A (2001-06-28),
D4: EP-A-0 543 588 (1993-05-26)

2. The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claims 1, 2, 7, 8 is not new in the sense of Article 33(2) PCT and because the subject-matter of claims 3-6 does not involve an inventive step in the sense of Article 33(3) PCT.

1. The document D1 discloses (the references in parentheses applying to this document):

A method of automatically analysing the structure of a software system (§51 and fig.5-501), comprising the step of using an automated software tool to determine the dependency depth level of each of several executables (record number of dependencies for each module, §69, §70) and to then partition the system by organising the executables into their respective dependency depth levels (sort modules into dependency order, §86 and fig.14).

2. The same reasoning applies, mutatis mutandis, to the subject-matter of the corresponding independent claims 7, 8, which therefore are also considered not new.
3. Dependent claims 2-6 do not contain any features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT in respect of novelty and/or inventive step, see documents D2-D4 and the corresponding passages cited in the search report.
